

Nicolás Azrak

Principal Software Architect & Platform Manager | Cloud & Backend Specialist

Argentina · nicolas.azrak@gmail.com · <https://www.linkedin.com/in/nicolasazrak> · <https://about.me/nicolas.azrak>

Professional summary

Proactive and results-oriented IT professional with over 13 years of experience building and leading high-performing software solutions.

Proven ability to architect, design, and implement scalable, secure, and innovative systems across various industries, including e-commerce and fintech.

Expertise in software architecture, cloud architecture, cloud engineering, and backend development.

Currently serving as Principal Software Architect & Platform Manager at Trafilea, where I lead the Platform team, a cross-functional group spanning Architecture, Cloud, and Security.

The Platform team drives strategic initiatives across the company, supporting both business and development teams.

The team actively contributes to Trafilea's global e-commerce platform and AI projects, delivering robust, high-performance, and secure solutions that enable growth and innovation at scale.

Professional characteristics

- Data-driven professional who leverages insights to optimize performance and make informed technical decisions.
- Meticulous attention to detail, code quality, and platform stability.
- Proactive problem-solving approach focused on anticipating challenges and implementing solutions quickly.
- Leadership focused on collaboration and empowering teams to achieve ambitious goals.

Experience

Trafilea Group

Company context

- Trafilea is described as one of the fastest-growing eCommerce ecosystems in the world, building communities and online brands.
- The company owns its brands and manages the customer journey including building, marketing, growth, and delivery of customer experiences.
- The CV states that these brands serve millions of customers worldwide.

Principal Software Architect & Platform Lead

October 2021 - Present · Remote

As Principal Software Architect and Platform Manager at Trafilea, I lead the Platform team, a cross-functional group composed of three key areas: Architecture, Cloud, and Security.

These disciplines work together to build and evolve the technological foundation that powers Trafilea's global e-commerce and AI initiatives.

The Platform team acts as a company-wide enabler, supporting business and product teams by providing scalable, secure, and high-performance solutions.

Platform team areas

- Architecture
- Cloud
- Security

Platform team disciplines

- Software Architects
- DevOps
- DataOps
- DevSecOps
- Web Security Engineers

Responsibilities

- Shaping architectural strategy.
- Driving cloud-native adoption.
- Embedding security across the stack.
- Ensuring platforms are resilient, efficient, and future-proof.
- Contributing to Trafílea's core e-commerce platform and AI-driven projects.
- Supporting company growth through scalable technological foundations.

Software Architect

February 2021 - October 2021 · Remote

Ualá

Company context

- Ualá is described as a mobile banking app and lending platform and one of the fastest-growing fintechs in Latin America.
- At the time reflected by the CV, the company was described as having launched in October 2017, issued over two million cards, raised almost 200 million in funding, and grown to over 300 employees.

Software Architect

February 2020 - February 2021 · Buenos Aires, Argentina

Responsibilities

- Understand long-term business objectives and suggest technical strategies to meet those objectives by introducing innovation through technology.
- Define robust architecture for new applications and releases, leveraging and enhancing existing building blocks or creating new reusable components.
- Participate in the analysis and validation of technical feasibility for new IT projects with the Development team.
- Coach Development teams on new IT projects.
- Implement solution architecture standards.
- Ensure compliance with firm standards.
- Integrate relevant solution sets already available within the organization.

Training and certifications

- Architecting Serverless Solutions · Amazon Web Services · January 2020

OLX Group

Company context

- OLX Group is described as a global product and technology company operating in more than 40 countries.
- The CV states that OLX platforms serve very large global audiences and focus on secure, resilient, and trustworthy systems.

Software Architect

October 2016 - February 2020 · Greater Buenos Aires, Argentina

Responsibilities

- Plan technical roadmaps.
- Define, estimate, and execute projects related to migrating a monolithic architecture toward a microservices-oriented architecture.
- Work collaboratively with Product, Development, Infrastructure, Data Science, and Business Intelligence.
- Participate in the analysis and validation of technical feasibility for new IT projects.
- Coach Development teams on technical projects.
- Investigate new technologies.
- Identify and validate innovations suitable for new projects.
- Design, develop, and maintain Java microservices from scratch.

Technologies and providers

- Java

Scale

- Approximately 65 million active users.
- More than 45 countries.

Personalization & Relevance Team

- Planning the technical roadmap for OLX's new search platform.
- Defining the architecture for the new search platform.
- Developing the new search platform.
- Developing a Solr indexing architecture.
- Microservices integrated using Kafka as streaming data.
- RESTful APIs integrated with predictive data models using an event-oriented architecture.
- Performance improvements involving response times, CPU utilization, and memory usage.

Technologies

- Java
- Solr 7
- Kafka

Scale

- Optimized to support more than 5,000 requests per second.

Training and certifications

- Big Data Systems · ECI UBA · August 2017
- Microservices Workshop · Chris Richardson · October 2017

Engineering Manager

May 2014 - October 2016 · Argentina

Responsibilities

- Leadership, coordination, and development of the new B2C communications platform for OLX LATAM based on company needs.
- Implementation of agile methodologies including Scrum and Kanban.

- Teamwork and coordination with stakeholders from multiple regions, including India, South Africa, Brazil, and other regions.
- Development and maintenance of multiple B2C communication channels.
- Responsibility for OLX email delivery services.
- Responsibility for push notifications for mobile devices.

Technologies and providers

- Dynect
- UrbanAirship
- TeleSign
- Twilio
- Panacea Mobile

Training and certifications

- The Leadership Challenge · Universidad Torcuato Di Tella · July 2015 - December 2015
- Continuous Conversations Training · Krauthammer · March 2016
